## PROFESSIONAL EXPERIENCE

---

**The Sam Tell Companies** *Computer Aided Design Drafter* Jan 2019 – Feb 2021

- Plotted, reproduced and organized drawings for internal and client use, serving over 100 clients each week, team of 10+
- Performed full sets of MEP drawings (equipment, electrical, plumbing, underground plumbing, special conditions, mechanical and refrigeration) for new construction and newly renovated buildings

**Piece Management Inc** *Millwork Drafter – Intern* Oct 2018 – Dec 2018

- Gave field verification and measurements for project sites; Drew custom products such as cabinets, countertops and POS systems to fit within the space – centered on direct specifications and customer service/satisfaction
- Created bills of material depending on the project site size and amount of casework needed

**Lencore Acoustics Corp.** *CAD Drafter – Intern* Jun 2018 – Sep 2018

- Analyzed architectural building designs noting the building codes, area and calculated the stresses and materials of the walls
- Designed the equipment placement based off of the architectural building design given for each project
- Emailed, called and assisted installers with any questions they have based on the wiring designs – working with 50+ daily

**The Parts Authority** *Operations Assistant* Jan 2018 – Jun 2018

- Created internal orders for entire stores nationwide, over 40+, to efficiency, crisis management, and customer satisfaction
- Assisted owners and operations managers to arrange flights, hotels, and business trips for employees, assisting several dozen
- Reviewed account documentation to ensure all customer accounts were secure and confidential

## PROJECTS

---

### Gaycation

- Web application to help people in the LGBTQIA+ community find safe cities to vacation
- Ability to create profile, search a city by name, add a favorited “gaycation”, comment, rate and interact with other users
- Used: React.js, NoSQL, MERN, Bootstrap, CSS, RoadGoat API & Yelp Fusion API with Axios

### Grubbr

- Tinder Clone - Web application to help users meet through their similar tastes in restaurants
- Ability to create profile, search restaurants by zip code, “like”/ “dislike” a restaurant and interact with users
- Used: React.js, NoSQL, MERN, Bootstrap, CSS, Yelp Fusion API with Axios

### PerfectPet

- Web application - Users can sign in/sign up to search for adoptable animals with special needs by zip code
- Used: HTML, CSS, EJS, Node.js, PetFinder API in Express with Axios, Sequelize, PostgreSQL, OAuth

### Galleria Saves The Planet

- Web application Game - player moves the main character up/down using the arrow keys to pick up trash on the beach, but they must avoid the “enemy”; Interactive connections and achieving-based play
- Used: HTML, CSS, JavaScript, Bootstrap and Canvas

### Weather Knowledge

- Web Application - Users searches weather of any city, interacting with location and customer care-based model
- Used: HTML, CSS, JavaScript with Bootstrap and an external weather API

## EDUCATION

---
